About Metaverse ——

In 2021, the hottest concept "metaverse"

March

Roblox, the first metaverse concept, goes public on the New York Stock Exchange

October

Facebook announces it will transform into a metaverse company within 5 years

December

Microsoft, Tencent, Byte Jump and other Internet giants have announced to join the meta-universe track

Origin

Origin of Metaverse OZ

The Wonderful Wizard of Oz" – The Wizard of OZ

The Wizard of Oz – A Beautiful New World

Metaverse OZ

Happy tree ––– Sending love to afforestation

Metaverse OZ

What can be changed?

Traditional Internet era - UGC platforms such as Twitter and Weibo get significant traffic - users are more like digital laborers
Metaverse era - turning users from workers to masters and returning data sovereignty to users
The Metaverse OZ platform empowers each user's creative content and social influence, helping users to realize their personal value and share the traffic and revenue of the platform.

—— Metaverse DZ ——

The five systems that must be experienced to build

1. Value system
2. Social system
3. Identity system
4. DAO Governance Management System
5. Underlying technology and hardware system

Value System

Macro & Micro Perspectives

Macro perspective: Value system - the social law of the Metaverse

Micro perspective: Creating a complete monetary system in the Metaverse OZ world with the DAO governance financial system

Using the DEFI concept to co-create a true Metaverse OZ governance token - MOZ

Social System

Metaverse OZ
Spontaneous development of the larger ecosystem

Based on the creative layout of reforestation, it will have a very rich industrial ecological extension.

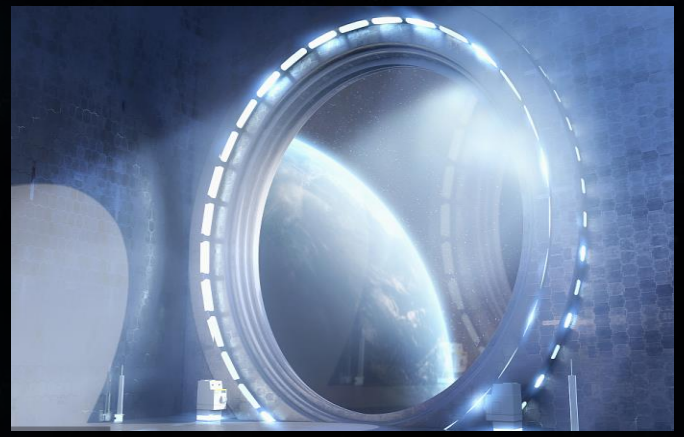
You can be in the virtual world of planting trees and benefit from it, while everyone can initiate to participate in the real world to plant trees and protect the earth.

Identity System

Identity System

相关前期工作已经在全球范围内展开，从 DEFI 到 NFT 到游戏上链已经初具规模
并能够 较为稳定的运行，这非常好，这些成熟或者逐渐成熟的创意和技术将会助力我们逐步完善 Metaverse OZ 的搭建。

DAO Governance Management System



The underlying layer of the metaverse consists of infrastructure and end hardware devices

These include but are not limited to: HCI, 3D engines, GIS, design tools, game rendering, image rendering, privacy computing, AI, operating systems, industrial internet, content distribution, app stores and smart contracts. On top of this, the metaverse also requires a large number of software and technology synergies: including but not limited to 5g, 6G, cloud computing, blockchain nodes, edge computing nodes and DPUs on the infrastructure side; routers, sensors, chips, VR head displays, monitors and brain-computer interfaces on the user side.

The concept of metaverse in social, collaborative office, entertainment and gaming scenarios will soon be catalyzed. In these scenarios, users' pursuit of experience will drive the innovation of metaverse technology carriers. In these scenarios, users' pursuit of experience will drive the innovation of metaverse technology carriers, which will be stimulated by multiple parties and jointly promoted, thus giving rise to more emerging industrial ecologies.

Underlying technology and hardware systems

DAO Governance Management System System

A Distributed Autonomous Organization (DAO) is a form of organization that accomplishes certain decisions and automates tasks under shared rules through a blockchain protocol.

Metaverse OZ will plan to recruit 33 guilds globally, including 99 communities and 297 clubs

Metaverse OZ Implementation Path

Version 1.0

Create the consensus of starting traffic: through the fairness of Dapp+Defi, the fun of blind box (fruit) + NFT cards and the fan program, forge the consensus Token - MOZ.

Version 2.0

Start the Genesis Happy tree chain tour "planting trees" at the same time online NFT Mall.

Version 3.0

On-line worker status NFT transactions

Metaverse OZ Implementation Path

Version 4.0

On-line land trading, planting trees need land, open application for forestry owner and forestry union function

Version 5.0

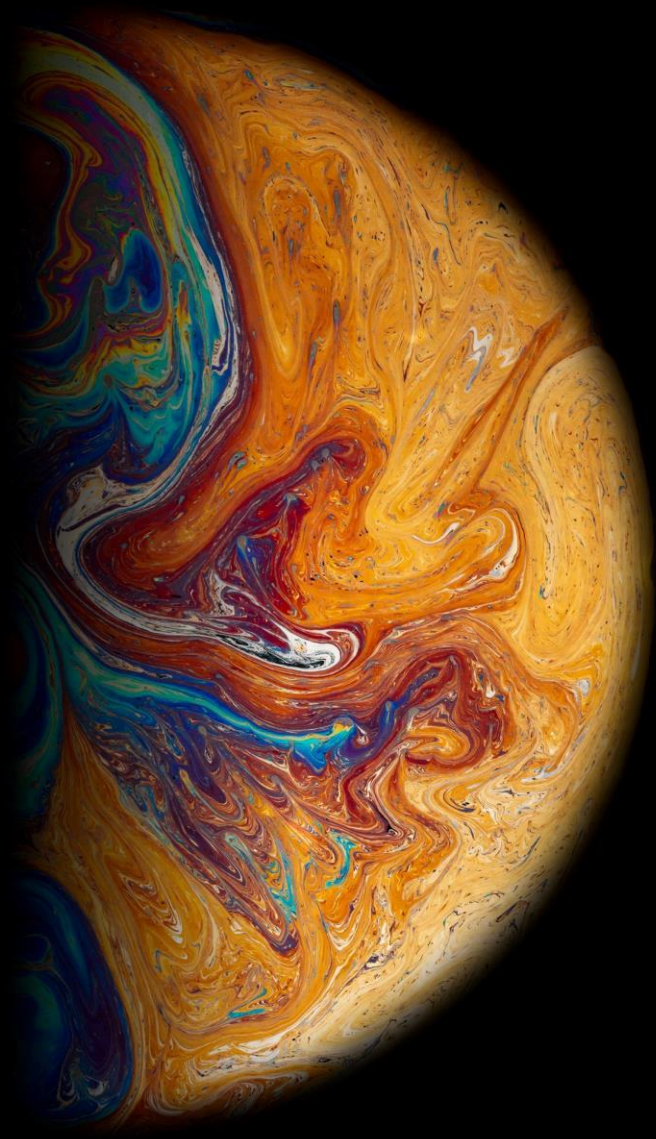
With the birth of the forestry union, there was a forest, so there were all kinds of animals. The NFT market is becoming more and more diversified with a variety of products ~ NFT.

Version 6.0

The needs of the workers are also increasing. They need to spend gold to guard the forest, and they also need water and food energy to replenish.
They also need to start a family. They need accommodation. So many people went to logging to build houses for rent.
This led to the emergence of towns and cities for trade.

Open

Metaverse Oz 1.0



LP Part

MOZ Total 2 billion

The distribution is as follows.

	Team	Foundation	Market	Sales + Ecology	Scientists + Donations
■Proportion	10%	15%	10%	60%	5%

Authentication Network Incentives

MOZ chain tour registration requires authentication (hash value non-traditional ID)

Authentication fee: 1000 MOZ

Immediately, you can have the following benefits.

1. Participate in the construction of 2 base fall body fan network

2.Participate in the fan plan and enjoy the benefits of the fan plan

3. Identification one-time fee

4.Account can be used permanently

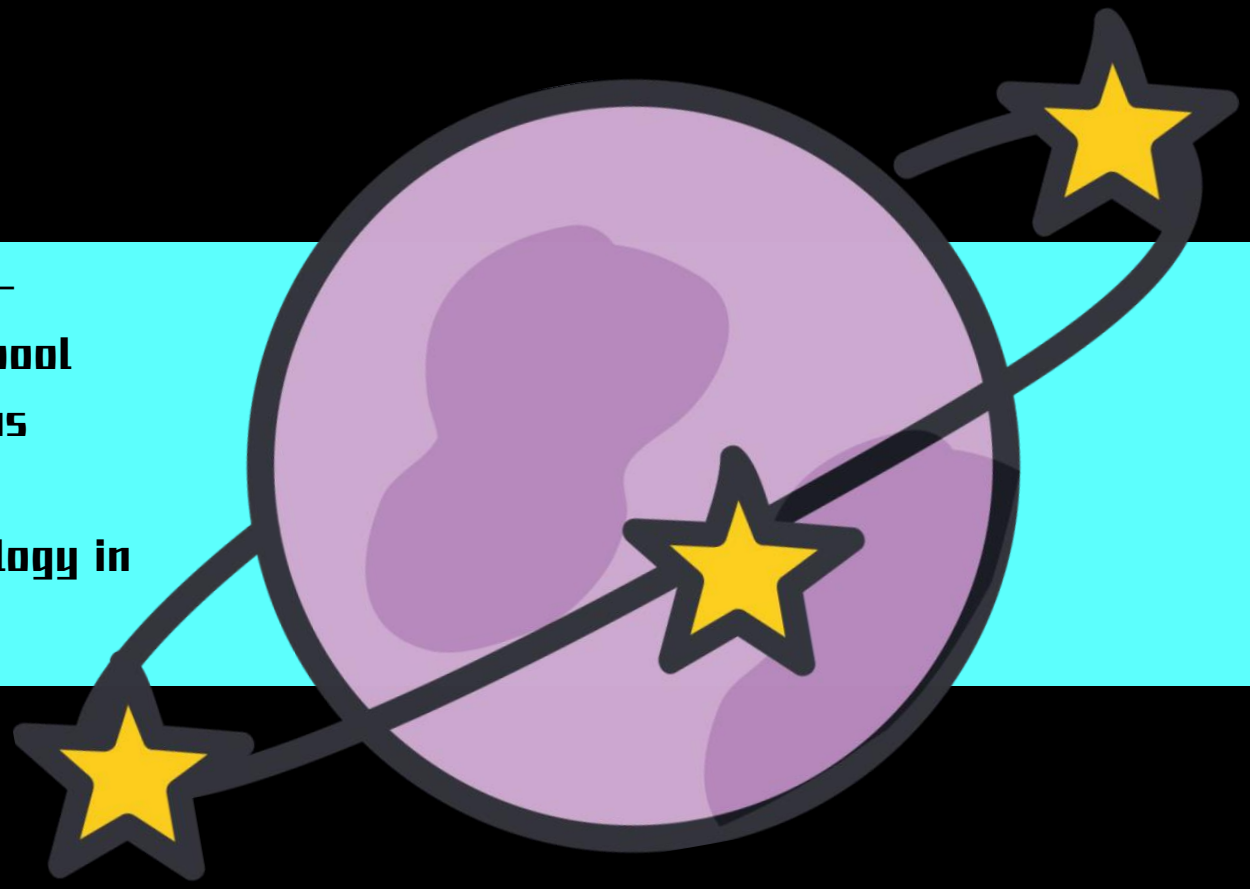
Genesis Happy tree Quantity

The total number of Genesis Fruits issued is 9990. Eligibility to grab the fruit campaigned to based on LP inventory ranking it is NFT and can be bought and sold in the trading market to gain revenue. If you choose to open the fruit, it can open wood, water, sunlight, energy or sapling. Sapling price is expected to be about 2 times of the fruit. The total number of saplings created is 999. Above as NFT can be traded in NFT mall. The development plan is in order: version 2.0 is expected to be launched about 30 days after version 1.0 is launched. At the same time, the real Genesis planting will start after the 2.0 version is launched. It is expected that LP will be open 1-2 weeks after the fruit grab.

Financial extension and industrial expansion

Future direction layout.

I. DAO organizations own self-care tokens for co-build -
Use MOZ to make investment or MOZ to co-build Defi pool
Second, cooperation with more excellent technical teams outside the local area -
To increase the construction of the overall industry ecology in the form of more and better quality chain products



Uncertainty that may occur

Metaverse OZ

A new concept of industrial upgrading type of innovation experiment
Innovative change in the midst of economic recession and epidemic pain

Team Lineup

ThomasCampbell
Case Chief Operating Officer

Thomas reveals latent potential by looking at the big picture and the details Thomas has been involved in e-commerce for almost 15 years and has acquired a variety of skills. He has designed and produced development logos and websites, expanded email lists, and helped colleagues create positive energy and motivation. Thanks to this blend of experience Thomas is able to bring balance and help different people across departments work together more effectively. The serial entrepreneur's recent experience includes overseeing the day-to-day administration and management of the ATM and payment processing company's operations functions. Emerging technologies and people have been at the center of his career.

Allen Foust
Case Chief Financial Officer

Allen has 8 years of experience as an Amazon Systems Architect. He is a financial systems expert and warehouse manager
He was an early investor in cryptocurrency and blockchain companies and served as a senior financial systems architect for the Zappos family of companies.

DaPhakousonh
Co-founder of Case

Allen has 8 years of experience as an Amazon Systems Architect. He is a financial systems expert and warehouse manager
He was an early investor in cryptocurrency and blockchain companies and served as a senior financial systems architect for the Zappos family of companies.

Andrew Medal
Case Consultant

Andrew Myrdal is the founder of DueDilly, which has received investments from well-known investors and investment groups investors including TribeCapitalDapperLabsVillage Global and EricRies Toy Enterprises and AceCap He works as an expert for Entrepriser Inc. contributor to thousands of articles The Next Web Site and Forbes, and has a video show about the entrepreneur that reaches 15 million viewers a month, and he interviews other super successful entrepreneurs and influencers for the network.

JustinBarr
Case Consultant

Justin Barr is an Internet entrepreneur who co-founded TapIt in 2011 to focus on mobile app infrastructure and experiences for enterprise brands and the $23 million acquisition of TapitMediaGroup, a mobile plant reporting company. He founded his latest company "Atlass" to help thousands of content creators earn more money by pairing unique ad units with artificial intelligence to get more from their content sites every day, resulting in higher revenue eCPM and happier creators. He is also a board member of Impact School
